

Please check to see that all information that does not bleed is inside the blue line.

**Note:**

Place all artwork on layer labeled "Artwork"

*Do not place anything on the layer labeled "Do Not Output", as this layer is a template layer and For Position Only.*

The Blue line indicates the safe area for text and any information that does not bleed. Also known as the 1/8" margin.

The Green line indicates the Trim Line. This is where the product will be cut. Anything close to this line may be cut off. This is why we ask for 1/8" bleed and 1/8" margin.

The Red line indicates the 1/8" Bleed necessary for any information that extends to the edges of the document. This is where all background art that bleeds should extend to.
